

# AFM100

The **AFM100** A/C flusher machine is a valuable tool to any technician. Avoid repeat repairs due to system contamination, creating a justified profit while increasing customer satisfaction. The purpose of flushing is to remove debris and contaminated oil, which renews and extends the life of the A/C system. The **AFM100** flush machine performs a proper cleaning service by completely removing debris and contaminated oil from the system, unlike other means of flushing. Pays for itself in months not years.

## WHAT DOES A PROPER FLUSHING REMOVE?

Debris from blocked expansion tubes, valves, condensers and/or evaporators. Creating a false computer reading on A/C systems.
