

# CoolantClean Solutions

***"All Solutions Are Not Created Equal"***<sup>™</sup>

## **MotorVac Solutions Flush and Lubricate any Radiator**

- ▶ Our **CoolantClean** CC5 flush solution will loosen and remove rust, scale and other residues that build up throughout an engine's cooling system.
- ▶ Our **CoolantClean** CC6 conditioning solution lubricates the water pump while preventing rust and corrosion in the cooling system.
- ▶ **CoolantClean** solutions use a proprietary formula that combine various elements to form a safe and effective cleaning and conditioning process.
- ▶ Our solutions do not contain methanol, isopropanol, hexanol, butanol or ethanol, or other potential corrosive materials.
- ▶ **CoolantClean** solutions will not damage the cooling system components and can be used with confidence.

The CoolantClean service kit is specifically formulated to be used with the CoolantClean system!

## **MotorVac CC5 & CC6**

Case of 6 (2 Step Service Kits)

Part # 400-0138

# ▶▶ MOTORVAC COOLANTCLEAN CC5 & CC6

## Why Use the CoolantClean Solutions?

MotorVac solutions gently remove residues and deposits that build up in critical areas of the cooling system. MotorVac solutions will not damage vehicle surfaces or paint, and are safe for use on all cooling system components.

## How MotorVac Solutions Work

### CC5

This radiator flush restores cooling system efficiency by removing rust, scale, and other contaminants. It is specifically designed for use with the Motorvac CoolantClean machine as part of the overall coolant system maintenance.

### CC6

The Water Pump Lubricant and Rust Preventative is specifically formulated as the final stage of the overall coolant system maintenance. It contains rust and corrosion inhibitors which help to prevent radiator deposits that can cause clogging and overheating.

## Features

- ▶ Non-Hazardous
- ▶ Non-Flammable
- ▶ Non-Carcinogenic

## Benefits

- ▶ Restores Cooling System Efficiency
- ▶ Prevents Rust and Corrosion
- ▶ Extends Radiator and Cooling System Life

## Why Use the CoolantClean System?

The CoolantClean system is designed to exchange virtually all of the used coolant mixture in a vehicle's cooling system, and do it in only a few simple steps! This turn-key radiator service system is easy to use and compatible with all vehicle coolant systems. The CoolantClean advanced flush system allows complete control. It connects through the upper radiator hose and provides a clean, "environmentally friendly" and systematic approach to servicing cooling systems. The unit will flush virtually all of the old coolant and replace it with the new coolant mixture in just a few easy steps. The CoolantClean service can increase a shop's profits by reducing the time it takes to do a complete fluid exchange to approximately 15 minutes!

The flush and lubricant process starts from the radiator through all the cooling systems fluid lines and into the water pump.
