**NITROKIT**

**Nitrogen Pressure Leak Test Kit**

**KEY FEATURES**
- Test manifold with 0-200 PSIG gauge
- 6’ Red service hose with 1/4” SAE female
- R134a HI side snap coupler
- 25’ Coiled air hose assembly with 1/4” MPT x 1/4” coupler

**WARNING:** Item must be used with nitrogen regulator.

**NITROKITG:** Includes the NITROKIT with a nitrogen regulator

The quality you need, in the tools you want!
In today’s ever-changing enviromental compliance requirements, the NITROKIT allows you to test a repair job without using refrigerant and venting to the atmosphere. The NITROKIT is needed to pre-check automotive A/C systems for leaks due to loose mechanical connections, hose leaks, evaporators and condensers. This kit allows for re-introduction of refrigerant into an A/C system with confidence and preventing unnecessary leakage of refrigerant.
